there is only one region the surface of the earth on which mankind finds its home yet although much effort is devoted by geographers towards the study of this diversified environment as a whole it has long seemed necessary by the methods of a special or a regional geography to study its component parts and although nature abhors lines geographers might appear to adore them so busily do they engage themselves in delimiting on their maps allegedly significant areas called a regions as a result every student of geography in school college of education and university has been taught read books and attempted to answer questions on regional geography the problem of region in geographic thought how it may be defined how it has developed and how it is applied has been vigorously debated within the discipline in this incisive examination of the types of regions and regional methods treated in modern geography roger minshull analyzes in detail the concepts of formal functional and city regions in an attempt to clarify this vexing problem in addition to sizes shapes boundaries and organization the phenomena that usually form the content of regions are delineated in an attempt to define the nature of regional geography as some regions are seen to be products of geographers minds it is suggested that certain influences especially the methods of mapping the separate topics that form the content of regions have been exaggerated regionalism and possible alternatives to the regional method are treated and a large section of the book is devoted to the idea of the compage in which the geographer s choice of topics and method of working is much freer than in more traditional approaches provided by publisher

the idea of the region has been a central concept in the understanding of the natural environment of human society and culture and of their interactions from the ancient greeks to the present in this book paul claval provides a critical introduction to the ways in which the concept of the region has been is and could be used to make sense of spatial organization and areal variation in human activities he examines both economic and policy issues and relates these to culture regional identity and ecology the book is divided into three parts part i provides a concise account of regional studies from the ancient greeks to the present it then outlines the main current issues in regional geography part ii describes the main perspectives on the division of

space the different kinds and typologies of regions and contrasting modes of regional representation paul claval also examines here how ecological economic social cultural and political phenomena can be understood through their areal variations part iii looks at how states and non state societies organize themselves regionally and of the evolution in contemporary dynamics of such modes of organization the author shows how the perception representation imposition and claiming of regions changes from non state societies through traditional to industrial societies and considers the merging of territorial borders of a globalized world economy this is a complete and penetrating survey of the regional concept as a key to the geographical imagination written by france s most prominent geographer it draws equally on anglo american intellectual traditions and is illustrated by a wide range of examples drawn from all over the world

this collaborative effort by an international team of geographers and educational broadcasters features a series of stories that explores the geographical forces shaping our world the contributors provide penetrating insights into a range of geographic is contributed papers on integrated geographical study of regions
